

AGREEMENT ON THE CONSERVATION OF  
AFRICAN-EURASIAN MIGRATORY WATERBIRDS

**6<sup>th</sup> SESSION OF THE MEETING OF THE PARTIES**

*9-14 November 2015, Bonn, Germany*

*“Making flyway conservation happen”*

---

RESOLUTION 6.17

**INSTITUTIONAL ARRANGEMENTS: TECHNICAL COMMITTEE**

*Pursuant to* Article VII of the Agreement, the first Session of the Meeting of the Parties (MOP), through Resolution 1.8, established and determined the composition of the Technical Committee,

*Considering* that at the present 6<sup>th</sup> Session of the MOP, the terms of office of two members of the Technical Committee expire - the regional representatives for North & Southwestern Europe and Northern Africa, the regional representatives for Southern Africa had to step down in advance of the expiration of his terms of office and that the position of the regional representative for Central Africa remained vacant in the past triennium; the terms of office of the three thematic experts (game management, environmental law, and rural development) expire too and that the position of a CEPA expert, as per Resolution 5.18, was not filled during the past triennium,

*Further considering* the recommendation of the Advisory Group, as per Rule 8 of the Modus Operandi of the Technical Committee, regarding the nominated candidates for the vacant positions,

*Thanking* members of the Technical Committee for their work in fulfilling the task stipulated by Article VII.2 of the Agreement, thereby contributing to the implementation of the Agreement over the past triennium,

*Noting* the relatively limited implementation of the Technical Committee work plan for 2012-2015 due to the growing volume of requests to the Committee by the Meeting of Parties, the lack of any earmarked resources with which to contract significant elements of work (e.g. technical reviews) and thus consequent reliance on prior fundraising by the Secretariat to progress these work areas, and the heavy constraints on the amount of *pro bono* input to the Committee’s work by its members as a consequence of economic austerity measures – as outlined in the Report of the Technical Committee to MOP6, document AEWA/MOP 6.7,

*Recognising* the need of prior strategic review by the Meeting of the Parties of Technical Committee tasks for the forthcoming triennium in order to allow prioritisation, and resource provision and mobilisation so as to ensure adequate work allocation and implementation,

*Further recognising* that the Technical Committee is a subsidiary and advisory body to the Agreement and the importance of its members being able to distance themselves from the possibility of a conflict of interest(s) between their personal and professional interests and their responsibilities to AEWA.

*The Meeting of the Parties:*

1. *Appoints* to the Technical Committee the members and alternates named in Appendix I to the present Resolution, taking into account terms of office in accordance with Rule 5 of the Modus Operandi of the Technical Committee and the geographical representation as laid down in its Annex;

2. *Approves* the work plan, summarising the scientific and technical tasks for the AEWA Technical Committee for 2016-2018 and their prioritisation as presented in Appendix II to this Resolution;
3. *Instructs* the Secretariat to provide the necessary support to the Technical Committee in accordance with Article VII of the Agreement, as well as the provisions in the budget for the Agreement and the activities of the Technical Committee or the Agreement Secretariat, as adopted under Resolution 6.18 on Financial and Administrative Matters;
4. *Encourages* Contracting Parties to include members of the Technical Committee in their delegations to the Meeting of the Parties, finances permitting, in order to enhance synergies between the bodies of the Agreement;
5. *Requests* the Technical Committee to create and maintain, as per Appendix III to this Resolution, a register whereby relevant interest(s) can be declared by its members (regional representatives, thematic experts, representatives of international organisations), observers from specialised inter-governmental and non-governmental organisations, and other appointed and invited experts.

## Appendix II

### Work Plan for the AEWA Technical Committee 2016-2018

#### Introduction

1. This section provides explanatory notes concerning the two attached documents (Appendix II, Parts 1 and 2).
2. Part 1 provides a summary list of proposed top priority scientific and technical tasks for the 2016-2018 triennium. This is drawn from Part 2 which provides a summary of the full list of proposed scientific and technical tasks for the work of the Technical Committee in 2016-2018.
3. Themes relate largely to the structure of the AEWA Action Plan as follows:
  - a) **Field of application<sup>2</sup>**
    - issues of the taxonomic and geographic scope of the Agreement
  - b) **Species conservation<sup>3</sup>**
    - including issues of legal regulation of taking; international single species action plans and their implementation; emergency measures; re-establishments; and introductions.
  - c) **Habitat conservation<sup>4</sup>**
    - including issues of habitat and site inventories; conservation of areas; habitat rehabilitation and restoration; and climate change adaptation and mitigation
  - d) **Management of human activities<sup>5</sup>**
    - including hunting (including lead issues); disturbance; species-conflicts and management of other human activities (e.g. impacts of energy generation and transmission, development, etc.)
  - e) **Research and monitoring<sup>6</sup>**
    - including planning and funding of surveys and monitoring
  - f) **Education and information<sup>7</sup>**
    - including all Communication, Education and Public Awareness (CEPA) issues
  - g) **Implementation<sup>8</sup>**
    - including Conservation Guidelines; Action Plan para 7.4 international reviews; and other implementation issues
  - h) **Strategic, reporting, emerging and other issues<sup>9</sup>**
    - including strategic, reporting and other planning issues; emerging issues and horizon scanning

---

<sup>2</sup> includes some of the issues covered by TC Working Group 10: Emerging issues (in relation to taxonomy)

<sup>3</sup> includes some of the issues covered by TC Working Group 1: Lead, hunting and trade and TC Working Group 10: Emerging issues

<sup>4</sup> includes some of the issues covered by TC Working Group 11: Habitat loss & degradation

<sup>5</sup> includes work currently undertaken by TC Working Group 1: Lead, hunting and trade; TC Working Group 8: Renewable energy and migratory waterbirds; TC Working Group 9: Disturbance; and TC Working Group 10: Emerging issues (in relation to seabird bycatch etc.)

<sup>6</sup> includes work currently undertaken by TC Working Group 4: Waterbird monitoring

<sup>7</sup> includes work currently undertaken by TC Working Group 5: CEPA & Communication Strategy and Plan

<sup>8</sup> includes work currently undertaken by TC Working Group 3: International Reviews, and TC Working Group 6: Conservation Guidelines

<sup>9</sup> includes work currently undertaken by TC Working Group 2: National reporting, Strategic Plan and Aichi Targets; Plan of Action for Africa; TC Working Group 7: Climate change; and some of the issues covered by TC Working Group 10: Emerging issues

4. The 14 top priority tasks listed in Part 1 below have been identified from the full range of proposed scientific and technical tasks listed in Part 2. These include all ‘Essential’ tasks and a few additional ‘High priority’ tasks.
5. The provisional figure for the total estimated funds needed for full implementation of the recommended 2016-2018 top priority tasks is € 561,000 over the triennium, whilst the total cost of the implementation of the full work plan is € 869,000.
6. Part 2 provides further details of all proposed scientific and technical implementation support tasks for the Technical Committee during 2016-2018. It provides a summary description of each task, with its anticipated outcomes and outputs, and provisional estimated costs.
7. As indicated in Part 2, a number of the tasks listed are either ongoing or have been carried forward from the task adopted by previous MOPs, but for which capacity or funding has been insufficient in the previous triennia to undertake or complete them.
8. Provisional estimated costs in Part 2 are based on each task requiring the engagement of an expert (or experts) to undertake the work required. These provisional estimated costs have been prepared by the Technical Committee and Secretariat to provide Contracting Parties with an initial assessment of delivery needs – more precise costings and the scope and ways and means for the delivery of each of the tasks will be developed at the beginning of the 2016-2018 cycle and reported to the Standing Committee at that time.

It is recognized that much of the funding estimated as being needed to enable further scientific and technical implementation support for the Agreement will need to be found from sources other than the Agreement’s core budget.

9. Please note that some significant tasks and costings given, relate to the work involved in developing Terms of Reference for the respective project (including the assessment of full costs), not the cost of delivery of the project for which funding will need to be sought.

<b>8. Strategic, reporting, emerging and other issues</b>	
<ul style="list-style-type: none"> <li>• <b>National reports.</b> Revise the national report format and make necessary adjustments on the basis of received feedback after the MOP6 reporting cycle and address necessary changes following MOP6.</li> </ul>	€20,000
<ul style="list-style-type: none"> <li>• <b>Population reporting for MOP 7.</b> Develop module for reporting on population status for MOP7.</li> </ul>	€20,000
<ul style="list-style-type: none"> <li>• <b>Review of Aichi Target delivery.</b> Assess progress on issues relevant to the Aichi Targets, and present triennial assessments of AEWA's contribution to each relevant Target, elaborating further needs as necessary and appropriate, for MOP7.</li> </ul>	€20,000

## Appendix II – Part 2

### Summary of Scientific and Technical Tasks for the AEW Technical Committee: 2016-2018

- A. The scientific and technical tasks for the Technical Committee are organized under eight broad themes, as follows:
- Field of application
  - Species conservation
  - Habitat conservation
  - Management of human activities
  - Research and monitoring
  - Education and information
  - Implementation
  - Strategic, reporting, emerging or other issues
- B. Prioritisation of tasks is as follows:
- Essential** (highest priority) – other MOP processes depend on the task being undertaken *e.g.* reporting to MOP 7
- High** – important to progress before MOP 7 i.e. to start work within the next two years
- Other** – important but initiation could take place on a longer timescale
- Rolling** – important and ongoing or soon-to-be-launched long-term activity
- C. The categorization of types of tasks is coded in the tables below as follows:
1. New or revised guidance for Contracting Parties
  2. Technical support and advice – ongoing and *ad hoc*
  3. Advice on new and emerging issues
  4. Input to scientific or technical products/initiatives undertaken by other relevant organizations
  5. Review of knowledge as a basis for developing guidance for Parties and others.
- D. Note that costs are significantly approximate and not derived from detailed costing of the specific tasks. Costs are for broad planning purposes only at this stage and will be further refined.

<b>Task</b>	<b>Priority for delivery</b>	<b>Category of task</b>	<b>Collaboration with other organisations</b>	<b>Supports Strategic Plan Objective and Aichi Target:</b>	<b>Provisional estimated cost (€)</b>
<p><b>Disturbance</b> Commission a synthesis of scientific knowledge of disturbance, including activities that are significant and widespread sources of disturbance, and dealing both with the effects of disturbance and with the possible mechanisms of adaptation, mitigation and compensation, and where relevant, summarising those studies that have evaluated the short-term effects of disturbance and its long-term impact on bird productivity and survival, both at the individual and population levels, and submit to MOP7 for consideration (Resolution 5.24) (carried over from Work Plan 2012-2015)</p>	Other	5		<p><b>Strategic Plan:</b> Objectives 2 &amp; 3.5 <b>Aichi Target:</b> Targets 12 &amp; 19</p>	[€40,000]
<p><b>Reducing energy impacts – Energy Task Force</b> Collaborate on implementation of CMS Resolution 11.27 on <i>Renewable energy and migratory species</i>. Task includes participation in the CMS Energy Task Force to provide further guidance and support in relation to the implementation of CMS Resolution 11.27. Task also involves providing further guidance when relevant new developments on reducing the impact of power lines on birds become available, such as improved mitigation techniques (Resolution 5.11). ## Appendix III - AEWA Technical Committee: Register of interests

### Introduction

As an international advisory body, it is essential that Technical Committee (TC) members are able to distance themselves from any possibility of a conflict of interest(s) between their personal professional interests and their responsibilities to AEWA. The TC therefore will create and hold a register whereby relevant interest(s) can be declared. These forms will be publically available on request. The following guidance on conflict of interest is relevant.

Conflict of interest is:

- a situation in which a person owing a duty to provide professional advice or skill is compromised in the performance of that duty by either a like duty to another whose interests' conflict with the first, or by the opportunity to make a personal profit;
- an obligation not to place oneself in a position of conflict arise from the duty of loyalty and confidentiality — this proscription applies to an actual conflict and extends to avoiding the appearance of conflict; and
- is determined objectively — the existence of a conflict of interest arises when a fair-minded person might reasonably suspect the person has a conflict of interest.
- Where there is conflict the person must act in perfect good faith and make full disclosure of the interest.
- A conflict of interest may be consented to — the person must act with full candour and make an appropriately complete disclosure about the conflict its likely scope and implications.

You should disclose interests that could: i) significantly impair your objectivity in carrying out your duties and responsibilities for the TC, or ii) create an unfair advantage for you or any person or organization; and which could result in your securing a direct and material gain through outcomes of a TC process (for example commercial advantage in gaining contracted work).

For the purposes of this policy, circumstances that could lead a reasonable person to question your objectivity, or whether an unfair advantage has been created, constitute a potential conflict of interest and should be disclosed in this form. Disclosure of an interest on this form does not automatically mean that a conflict is present or that you will be unable to perform your designated role with the TC.

If in doubt about whether an interest should be disclosed, individuals are encouraged to disclose that information. In filling out this form, we rely on your professionalism, common sense and honesty.

It is the responsibility of each individual to ensure that their declaration is up to date at all times.
