

13th MEETING OF THE STANDING COMMITTEE*03 - 05 July 2018, The Hague, the Netherlands***DRAFT FORMAT FOR NATIONAL REPORTS ON THE
IMPLEMENTATION OF AEWA 2018-2020****Introduction**

From the second to the third Sessions of the Meeting of the Parties (MOP), the Contracting Parties to AEWA compiled their national reports on the implementation of the Agreement following a format approved by MOP1 in 1999. In 2005, MOP3 instructed the development of a new format to be used for online reporting. This was elaborated together with the development of the AEWA Strategic Plan for 2009-2017 (extended until 2018 by MOP6 in 2015). This format was subsequently used for reporting to MOP5, MOP6 and MOP7, whereby pertinent amendments were made to it following each session of the MOP.

It is expected that MOP7 in December 2018 will adopt the AEWA Strategic Plan for 2019-2027, which will require a more thorough review and adaptation of the national report format. The present draft is based on the latest version of the national report format for 2009-2018 used for MOP7 reporting. It retains all reporting requirements as per the Agreement Action Plan and introduces new reporting requirements as per the draft Strategic Plan 2019-2027. The post-MOP8 reporting requirements arising from the draft Strategic Plan are not included. Amongst them are those related to indicator B of Target 1.3, indicator B of target 2.1, indicator 2 of Target 3.1, indicator 2 of Target 3.2, Action 4.1(c), Indicator 2 of Target 4.4 and Action 5.1(b).

This draft revised format for national reports was reviewed by the Technical Committee and approved at its 14th Meeting in April 2018. Chapter 3 of the format on population status, will be initiated later in 2018 to be presented to the 15th Meeting of the Technical Committee in early 2019 for review and approval to be followed by an approval by the Standing Committee for use in the MOP8 reporting cycle.

A specific module will be elaborated for reporting on the progress of implementation of the Plan of Action for Africa and will be submitted to the Technical and Standing Committees alongside chapter 3 as described above. After the adoption of the format by the MOP, it will be translated by the Secretariat into an online template within the CMS Family Online Reporting System as soon as possible, pending necessary adjustments by the Standing Committee, due to decisions by the MOP, which involve additional reporting requirements.

Action Requested from the Standing Committee

The Standing Committee is requested to review and approve the draft revised format for national reports on the implementation of AEWA 2018-2020 for submission to the 7th Session of the Meeting of the Parties to AEWA.

STATUS

3.NUMBERS AND TRENDS OF NATIVE AND NON-NATIVE SPECIES OF WATERBIRDS

This section of the National Report Format (NRF) for MOP8 reports will be based on the template used for reporting by the European Union member states under Article 12 of the EU Birds Directive for the period 2013-2018. It will include only some fields of the EU reporting template, notably those in Annex B, chapters 1-5, and will adapt them to the AEWA format, as necessary (*please see for reference the full EU Article 12 reporting template attached in the end of this document*). **The actual design and architecture of section 3 will be created in later in 2018 and submitted to the Technical Committee for review and approval at its 15th meeting in early 2018. The agreed version will be then submitted to the Standing Committee for approval for use in the MOP8 reporting cycle.**

The alignment of the AEWA MOP8 NRF with the EU Article 12 template for 2013-2018 will, on the one hand, allow reporting of all necessary information by the AEWA Contracting Parties needed for the assessment of the status and trends of AEWA population, and, on the other hand, will require the EU members states that are Contracting Parties to AEWA to report only once their national data for the native species listed on Annex 2 of AEWA, providing that access to the EU Article 12 national reports will be granted to the AEWA Secretariat.

Unlike the EU Article 12 template, the AEWA MOP 8 NRF will request the same type of information for non-native waterbird species as for native species. The EU members states will therefore need to fill out the AEWA MOP8 NRF with respect to the status and trends of the non-native waterbird species occurring in their territories.

In order to be able to use the national data reported by the AEWA Contracting Parties for the 8th edition of the AEWA Conservation Status Report (CSR8), this chapter of the AEWA MOP8 NRF will be set up separately in the CMS Family Online Reporting System and the deadline for submission will be set at 30 June 2020. For the rest of the AEWA MOP NRF, the deadline for submission will be, as usually, 180 days before the date of the MOP.
